

Exceptional positioning system that promotes 24/7 postural support and enhanced quality of life

Improved skeletal development and recuperative periods of rest are part of any 24 hour postural management program. The Jenx Dreama system goes beyond conventional positioning aids by providing a specially designed pressure mattress and a variety of support pads that can be configured to accommodate the most complex needs. It helps provides contoured postural control and continuous positioning comfort throughout the day and night.

By supporting at risk limbs and helping reduce tonal spasms, the Dreama can make a positive contribution towards minimising the risk of muscular skeletal deformity. It can be used as a preventative system or to reduce the risk of further postural deterioration, and is therefore appropriate for any age and is suited to conditions such as cerebral palsy, muscular dystrophy, spina bifida and scoliosis.

KEY FEATURES:

- Dreama base and mattress includes a contoured, flexible aluminium base for the custom lying surface and full set of mattress cells; full set of neutral covers and pair of anchor straps.
- The pressure reducing 15cm modular mattress removes the need for overlays.
- Spaces between mattress cushions allow airflow, helping to maintain a comfortable temperature.
- Grid lock supports that minimise disturbance when positions are adjusted.
- Individual covers can be removed or replaced without the need to remove the person from the bed, minimising sleep disruption and the need for assisted transfers.
- Quick, simple assembly and exceptional flexibility with numerous accessories.

Dreama Side Lying System

OPTIONS:

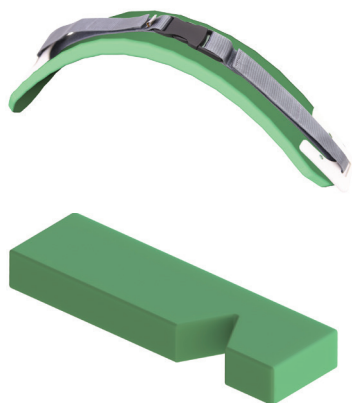

Dreama Positioning Pads

	Standard Pad	Memory Foam	L (mm)	W (mm)	H (mm)
Slim	7120-3250-000			108	159
